

CLIMATE ACTION NURSES

TOWARDS 2030 - NURSES LEADING URGENT CLIMATE ACTION

Our Vision: Empowering Australian and Pacific Nurses to take urgent climate action for themselves, their workplaces and their communities.

Climate Action Nurses' Theory of Change: Three Key Impacts

IMPACT

**Our Goals
2024 - 2026**

CLIMATE READY HEALTHCARE

Develop resilient nursing practice and contribute to climate ready healthcare in the 21st century.

CLIMATE FRIENDLY COMMUNITIES

Support nurses to decarbonise and lower emissions inside and outside of the healthcare sector.

CLIMATE SMART NURSES

Develop planetary health and sustainability nursing education, research and capacity.

OUTCOMES

**Four pillars of
CAN**

POLICY

ADVOCACY

EDUCATION

RESEARCH

Develop evidence based, scientific and informed policy to drive health, government and adjacent industry change.

Implement our policy, amplify vulnerable and First Nations voice and foreground nursing wisdom in climate action,

Educate ourselves, our workplaces and our community on climate action and planetary health

Nurse led trans-disciplinary research to inform and validate our nursing interventions and practical solutions

OUTPUTS

**What we will
do**

ACTIVITIES

**How we will
get there by
2026**

- 1 Develop and implement planetary health and sustainability nursing in Australia position statement and standards of practice.
- 2 Bring the Nurses Climate Challenge to Australia and be the regional partner of Alliance of Nurses for Health Environment.
- 3 Continually publish Climate Action Nurses quarterly enews to inform and educate the profession.
- 4 Complete and publish nursing undergraduate curriculum climate health inclusion review.
- 5 Maintain strategic partnerships and leverage the nursing voice of peak bodies.
